

Who are we ?

We are tri-campus organization that aims to educate students on all things blockchain. Our members are involved in conferences, education, development, mentorship, internships and more. Our leadership is committed creating an inclusive and collaborative environment for all.

What is blockchain ?

At its most basic level, blockchain is quite literally a chain of blocks. These blocks hold data and are linked to each other. The 'block' of data is stored on the 'chain' which is a public database. Some features of blockchain include immutability, transparency, and more!

JOIN THE CHAIN

uwblockchain.org @uwblockchain blockchn@uw.edu

Recruitment starts NOW

fill out the member survey.
